Fun little puzzle game with pretty great design. A little frustrating to navigate around the pieces sometimes but overall I really enjoyed immersing myself in it for the time I played it. Would recommend if you like interesting mechanics in a puzzle game.. This is a simple charming game about puzzles and exploration, based on a spatial orientation mechanic. It is presented with no words, which is a blessing for the aesthetics but a curse for the sometimes complicated ideas the game tries to convey. It is easy to accidentally solve puzzles and cross one-way barriers, which can be disorienting and a little irritating, but it's a necessary consequence of the game's mechanics. I was able to complete every puzzle and find every secret in one 3-hour sitting, and I don't expect to play it again.. Amazing game, found it accidentally and really enjoyed it. The art and colors really pop and are quite different from everything else. The music is also super fitting, playful and simple. It reminds me of Fez with the way you manipulate dimensions. The secrets are also super clever and creative, simple enough to figure out but some are also very complex (especially the spooky parts). Transitions are super smooth, and I always love showing my high friends how much of a mind this game can be. Actual 10/10. It made me so happy to play and even happier that I got all the achievements.
